Editors-in-Chief:

Dietrich Rebholz-Schuhmann (United Kingdom) and Goran Nenadic (United Kingdom)

***Journal of Biomedical Semantics* is an open access journal that encompasses all aspects of semantic resources used for data integration, modeling, interpretation and exploitation in biomedical research.**

Journal of Biomedical Semantics aims to address issues of semantic enrichment and semantic processing in the biomedical domain and comprises practical and theoretical advances in biomedical semantics research with implications for data analysis.

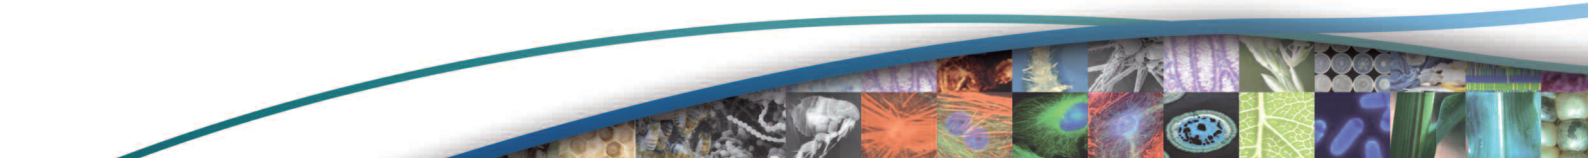

Topical areas include, but are not limited to: design, development and maintenance of semantic resources, semantic infrastructure development and access to data, semantic enrichment, mining and annotation of biomedical data, automated semantics-driven analysis and reasoning in biomedicine, exploitation and impact of semantics on biomedical research.

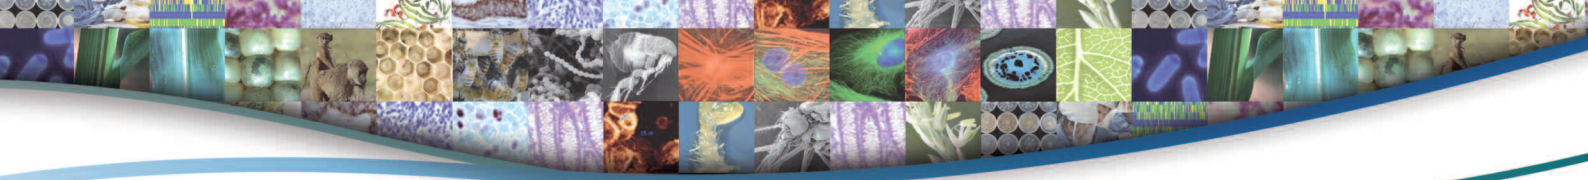

The journal considers the following article types: research articles, short reports, reviews and database articles. For further details, see www.jbiomedsem.com/info/about.

Reasons for publishing in *Journal of Biomedical Semantics*:

- All articles published in the journal are open access; universally accessible online without charge.
- High visibility for your work - anyone with Internet access can read your article, free of charge.
- Included in PubMed - making your work easy to find, read and cite.
- Articles are published immediately upon acceptance.
- Authors retain the copyright of their articles.
- Electronic submission and peer-review makes the whole process of publishing your article simple and efficient.
- Publishing online means unlimited space for figures, extensive datasets and video footage.
- Professional formatting meets the standards expected by researchers.
